We are Trifleet.
We do it right.

About Trifleet

For over 30 years, our focus on sustainable excellence has kept us at the global top of our industry. We create environmental-friendly solutions with great attention to detail, regulation, and service.

No matter where you or your products are, Trifleet is here with you. Our 24/7 Client Portal, support in all timezones and Fleet Service Management make tank container transport accessible for clients across the world.

About Trifleet

Part of GATX

Since 2020, Trifleet has been part of the American GATX Corporation. GATX is a leading global provider of railcar leasing throughout North America, Europe, and India.

About Trifleet

Team Trifleet

With their unique perspective and years of experience, in- and outside of Trifleet, the team's vision and skills drive the company towards a bright future.

About Trifleet

Sustainability

We strive to be our client's number-one choice by offering best-in-class solid, safe container tanks and an excellent customer experience.

Benefits of leasing with Trifleet

Easy, safe and accessible

We make leasing a tank container easy, safe and accessible. First, let us understand your specific needs and help you with advice. Then, select one of our available or newly build tank containers with the help of our global experts. After the contract is finalized, you will receive an on-hire report. The tank container can be picked up and transported by road, rail, and sea across the world. You return the cleaned tank container to an agreed depot at the end of the lease. You will receive an off-hire report and a verified estimate for repairs or additional cleaning.

Setting the standard

Trifleet is ISO-certified for over 30 years. Every tank container is repaired, cleaned, and restored according to Trifleet criteria (ITCO ACC+) to ensure every next lease is excellent.

Telematics

Trifleet works with the best-in-class telematics supplier to fulfil your hardware requirements and be your point of contact for hardware questions. Our preferred supplier offers full-fledged and customized solutions to our industry with fully certified hardware (CE, ATEX IIC, ISO9001, ISO27001 and ISO27017).

Discover our tank containers for Chemicals

Why Trifleet tank containers

- ▶ Widely experience in modifications to meet your product needs
- ▶ Large number of tanks already equipped with linings or coatings

Our tank containers

Standard Tank Containers

Our Standard Tank Containers are designed with sustainability, safety, and efficiency in mind. They are maintained with the highest standard of cleanliness and quality.

Capacity of these tank containers vary between 14,500 and 26,000 liter. These tank containers have a bottom discharge with a top discharge provision or only a top discharge and can be equipped with or without baffles. The UN portable tank instruction varies from T11 to T14.

These tank containers are used for various chemicals such as:

- ▶ Petrochemical,
- ▶ Oil additives,
- ▶ Benzene,
- ▶ Solvents,
- ▶ Phenol,
- ▶ Styrene,
- ▶ Surfactants,
- ▶ Ethyl,
- ▶ Acetate and glycol.

Specifications:

Capacity range	14,500 to 26,000 liter
Test pressure	4-10 Bar
Bottom discharge	Top discharge optional
Max. temperature	150 Celsius
Stainless	316L

Our tank containers

SWAP Tank Containers

Our SWAP bodies offer versatile, large-capacity solutions for transporting low-density products by road and rail.

Capacity of these tank containers vary between 27,000 and 35,000 liter. These tank containers have a full walkway, handrail, an optional bottom operated airline and can be equipped with or without baffles. The UN portable tank instruction varies from T11 to T14.

These tank containers are used for various chemicals such as:

- ▼ Petrochemical,
- ▼ Oil additives,
- ▼ Benzene,
- ▼ Solvents,
- ▼ Acetone,
- ▼ Polyol,
- ▼ Ethylene and glycol.

Specifications:

Capacity range	27,000 to 35,000 liter
Test pressure	4.5-6 Bar
Bottom discharge	Top discharge optional
Walkways and handrails fitted	Yes
Baffles	Optional
Stainless steel	316L

Our tank containers

Special Tank Containers

Our Special Tank Containers provide specialized configurations and capacities designed to accommodate various cargo types and specific requirements.

Capacity and specifications of these tank containers vary based on customer needs. For example, these tank containers can be non-insulated or high-insulated and equipped with an internal lining or coating and various flanges and fittings. Or can be equipped with a top and bottom (side) discharge, spill box covers, full walkway and double handrail (bottom operated). The UN portable tank instruction varies from T11 to T23.

These tank containers are used for various products, such as:

- ▶ Corrosives
